Water Resources

Protectin throughout Asian and

Upper half of the opening IDNR screen

Protecting The Great Lakes

Protecting the Great Lakes is vital to millions of people from Illinois and throughout the Midwest who rely on these waterways for their livelihoods. Asian carp eradication measures include increased fish collection, population suppression, biological control efforts and electric barriers. These methods assist in the prevention of Asian carp bypass between the Des Plaines River and the Chicago Sanitary and Ship Canal (CSSC) as well as the Illinois and Michigan Canal and CSSC during flooding.

Total all nois is b Fringe

Fringe Floodway

Flood Level With Fringe Filled (BFE with Floodway)

BFE

Normal Stream Level

Zone AF

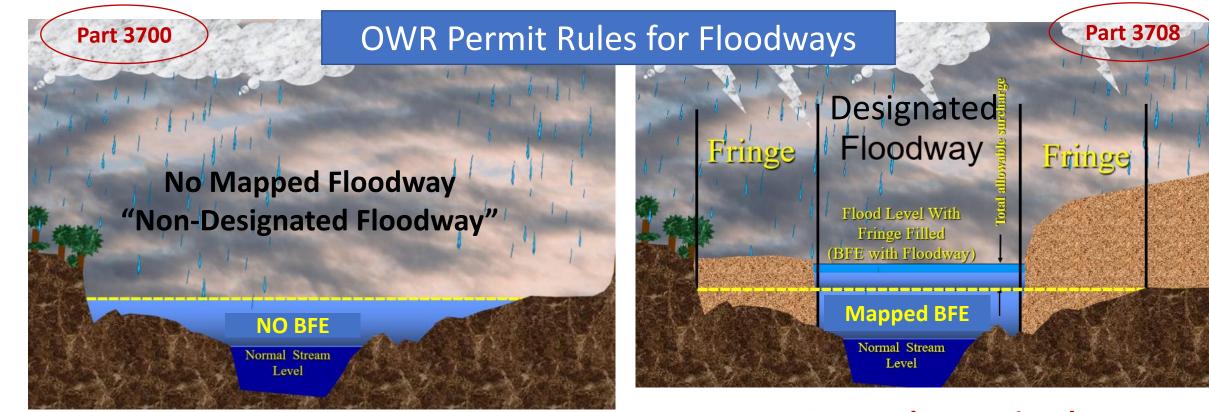

Zone AE

Part 3708 A State Permit is required in a Mapped Floodway "Designated Floodway"

Part 3700

Floodplain with no identified, mapped Floodway "Non-Designated Floodway"

Waterway Drains more than 1 Square Mile (Urban) and 10 Square Miles (Rural)

Part 3700 Rules require that:

Issue a Formal Permit with:

Project Channel Conveyance must be maintained New Bridges < 0.5-foot W.S. increase (0.1 ft 1000 upstream) Replace Bridges =>conveyance, damage assessment List of exempted activities: maintenance, remove culverts/debris Minor construction may apply for <u>Statewide Permit</u> No Delegation option

Part 3708 Rules require that:

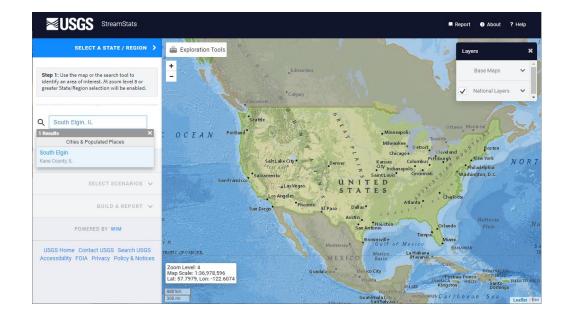

Issue a Formal Permit with: Velocity not be increased by 10% through the reach 0-10 and 10-100-year Compensatory Storage needed Water Surface increases less than 0.1 feet or 0.0 feet Minimize Upstream damages in your design Letter stating no upstream damages by replaced culvert Regional Permit #3, Delegation, or PNR may apply.

A floodway **allows for development in floodplain fringe**. A floodway is smaller of <u>0.1 ft water increase</u> **OR** <u>90%-volume</u>

The IDNR/OWR has jurisdiction over **new floodway construction in** watercourses which have a drainage watershed area of:

- 1 square mile or more (640 acres) in an urban area, or
- 10 square miles or more (6400 acres) in a rural area (not developed in next 5 years)
- Consult with IDNR/OWR for assistance with determining jurisdiction

Use **USGS StreamStats** to determine upstream watershed Area at: www.Streamstats.gov/ss/

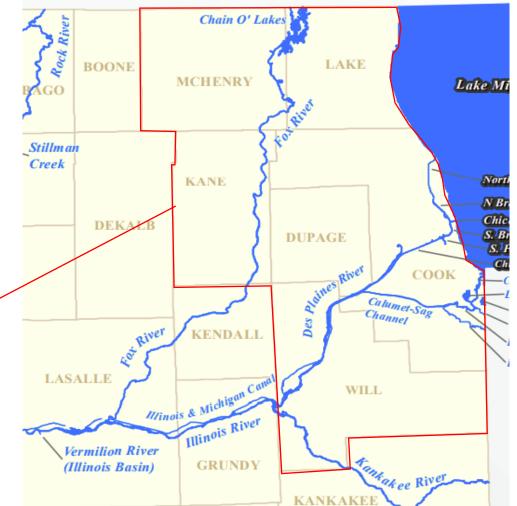

DOWNSTATE COUNTIES

All jurisdictional streams are Part 3700 Rules regardless of the floodway/floodplain mapping (no Part 3708 for downstate areas)

NORTHEASTERN ILLINOIS

Part 3700 for jurisdictional streams which do <u>not</u> have regulatory designated floodways

The Part 3708 Rules only applies to Northeastern Illinois

Two types of Part 3700 Rule Permits offered:

1. Statewide Permits (next slide)

Statewide Permits are pre-authorizations of certain minor projects which are permissible per the Part 3700 rules. A Joint Permit Application Form submittal is usually not needed.

2. Formal Permit

Formal Permits are needed for significant projects which do not meet a Statewide Permit. These projects generally require an extensive project review of hydrologic & hydraulic engineering data. Examples: New Bridges, Culverts, and Levees

Current Active Statewide Permits

- SWP 2 Bridge and Culvert Crossings of Streams in Rural Areas
- SWP 3 Mooring Facilities Used Exclusively for Barge Fleeting Purposes
- SWP 4 Aerial Utility Crossings
- SWP 5 Minor Boat Docks (10' wide, 10 ft inside P/L, 50' long max.-%chan.dist.)
- SWP 6 Minor Non-Obstructive Floodway Construction
- SWP 7 Outfalls
- SWP 8 Underground Pipeline and Utility Crossings (>3 ft. below channel)
- SWP 9 Minor Shoreline, Stream Bank, and Channel Protection activities
- SWP 10 Accessory Structures and Additions to Existing Residential Structures
- SWP 11 Minor Maintenance Dredging
- SWP 12 Bridge and Culvert Replacement Structures
- SWP 13 Temporary Construction Activities
- SWP 14 Special Uses of Public Waters

Part 3708 regulatory floodway construction jurisdiction of watercourses in Cook, DuPage, Kane, Lake, McHenry and Will counties (not in the City of Chicago) if the watercourse has a drainage area of:

- 1 square miles or more (640 acres) in an urban area
- 10 square miles or more (6400 acres) in a rural area (not developed within 5 years)
- Consult with IDNR/OWR for assistance with determining jurisdiction

Rural Urban Urban-Residential

Two types of Part 3708 Permits offered:

1. Regional Permit No. 3 (next slide)

Regional Permit No. 3 is a pre-authorizations of certain minor projects which are considered permissible per the Part 3708 rules. No computer hydrologic or hydraulic modeling needed. A permit application submittal is usually not needed.

2. Formal Permit

Formal Permits are needed for significant projects which do not meet Regional Permit No. 3. These projects generally require an extensive project review of engineering data.

Examples: Bridges and Culverts, Channel Modification Projects, Flood Control Projects

Formal Permit Submittal

Regional Permit No. 3 – Authorizes only four categories:

- 1. Underground and overhead utilities,
 - a) No existing elevation increases, Casing 3 ft. below streambed, generally no cofferdams allowed for RP3
- 2. Storm and sanitary sewer outfalls,
 - a) Pipe not project outward into waterway, less than 1000 CFS flow, velocity < scour velocity
- 3. Sidewalks, patios, athletic fields, playground equipment, and a) No fencing or fill to be placed, anchor equipment
- 4. Streambank protection activities.
 - a) Shoreline protected < 1000 feet, materials (concrete / sheet pile) not placed higher than existing top of bank

RP3 can be found at: https://www.dnr.illinois.gov/WaterResources/Pages/PermitsStatewide

IDNR/OWR Floodway Permit Program Part 3700 Rules vs. Part 3708 Rules

ONLY within PART 3708 RULES

•Appropriate Uses ("allowable construction" in the designated floodway)

- Required Floodway Map Revisions (designated floodway changes)
- •Delegation (Submit a Joint Application Form)
 - Municipalities/Counties (DuPage, Lake, and Will)
 - IDOT 2013 MOA Agreement

Some Appropriate Uses 3708.70 c): Flood control structures, outfalls, garages, storage sheds, bridges, culverts, <u>parking lots <one-foot deep BFE</u>, no-fill regrading, floodproofing, <u>repair damaged</u> <u>building<50% market value</u>, modification to existing buildings with no increased floor area, and more.

IDNR/OWR Floodway Permit Program Part 3700 and 3708 Rules

Permit Application **Review Fees** for Formal and Delegated permits

- Part 3700 bridges-filling-levees H&H = \$3,130
- Part 3708 bridges-filling-levees H&H = \$3,760
- If a Public Notice needed add \$1,880
- Delegated fee = \$ 250 The total fee may not exceed \$5,000

Fee Schedule and details can be found at:

http://www.dnr.illinois.gov/WaterResources/Pages/default.aspx

- Check or Electronic Payment
- The fee increases/decreases based on U.S. Labor Consumer Price Index

A Joint Application Form (JAF) is needed for...

- Floodway construction requiring a <u>formal permit</u>
- Application to be "Delegated" to a community (DuPage-Lake-Will)

How to Submit a JAF...

- Can submit PDF electronic package to <u>William.Boyd@illinois.gov</u>
 Some very detailed construction sheets, may need paper copy transmittal
- Permit application package: Joint Application Form, a project report that outlines existing conditions, hydrology and hydraulics, and project scope
- Initial questions? Call Bartlett Office (847) 608 3116
- Provide the review fee before a technical review may begin

When not to Submit a Formal Permit...

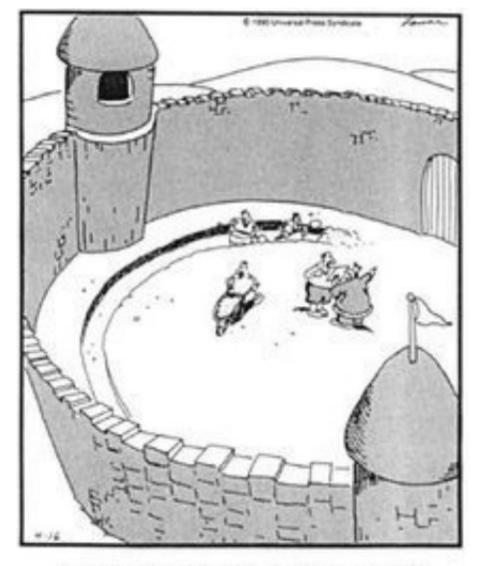

A Joint Application Form submittal is <u>not</u> needed for floodway construction activities that:

 are not jurisdictional (less than 1 SM watershed for urban zoning),

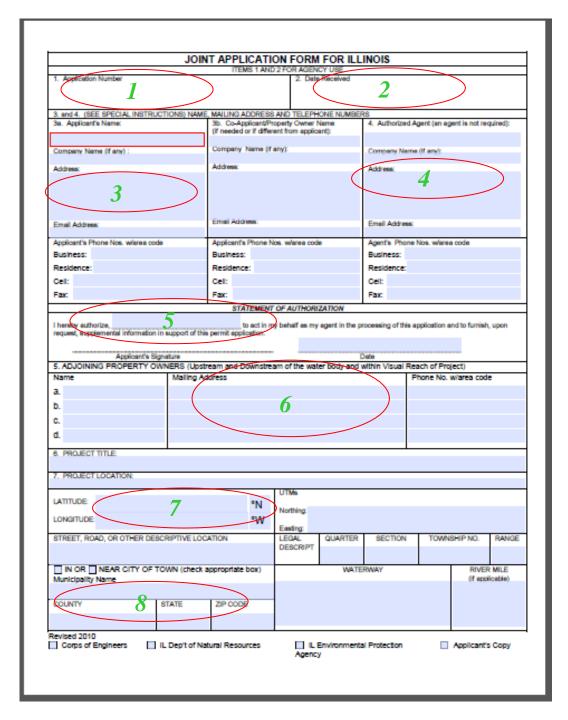

- are authorized by a Regional or Statewide permit (minor construction),

- are an exempted activity such as (maintenance-remodeling),

– If a project can be authorized by IDOT/DOH per MOA (review taken-over by IDOT/DOH).

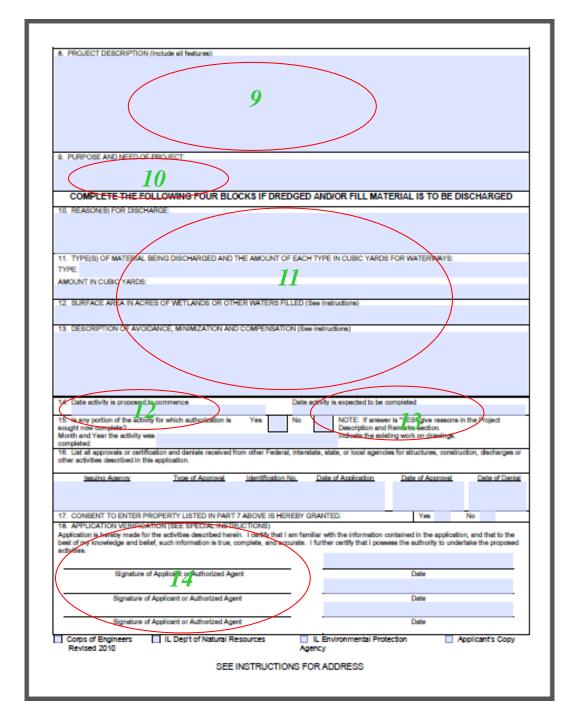

Suddenly, a heated exchange took place between the king and the moat contractor.

Joint Application Form

with the US Army Corps of Engineers

- 1. Application number (OWR assigns)
- 2. Date Received (in Bartlett Office)
- 3. Applicant's name (with contact info)
- 4. Agent's name (often the Engineer)
- 5. Statement of Authorization (allows signatory authorization for the Agent)
- 6. Adjacent Property Owners Information
- 7. Project Location (Latitude, Longitude and Section-Township-Range)
- 8. Municipality of the project (in or near)

Joint Application Form

with the US Army Corps of Engineers

- 9. Brief description of Project
- 10. Purpose of Project
- 11. For Dredging Projects Only
- 12. Start Date of Project
- 13. Projected Date of Completion
- 14. Signature and date

<u>https://www.dnr.illinois.gov/WaterResources/Pages/PermitApplicationandInstructions.aspx</u>

Supporting Information

- Narrative (Meet with us before submittal)
- Location Map (project location and size of property)
- FIRM (use the National Flood Hazard Layer maps)
- Site Plan (show property limits, 11x17 sheets are ok)
- Grading Plan (overlay existing and proposed grades)
- Provide Cross Sections (especially road projects)
- Construction Drawings (PE sealed title sheet)
- Computations/H&H Analyses (provide digital models)
- Engineering Report (w/ flood damage assessments)

od Hazard Layer (NFHL) Viewer

National Flood Hazard Layer viewer

ONLY ONE COPY of APPLICATION SUBMITTAL IS NEEDED...

Application Submittal Information Sometimes Overlooked or Over-reported

Narrative Outline

- 1. Existing Conditions Locate by major roadways, FIRM panel Number
- 2. Proposed Project Phased construction? Upstream damage?
- 3. Hydrology and Hydraulics FEMA model? Add Cross Sections?
- 4. Mitigated Storage Calculations Fill in Part 3708 floodway, 0-10 & 10-100?
- No Wetlands Information or most HEC-RAS Cross Section plots
- Summary Tables for Hydrology and Hydraulics (*Existing vs. Proposed*)
 - Water surface changes (10yr. & 100 yr.)
 - Conveyance, storage, and % velocity at each cross section (10yr. & 100 yr.)

Application Submittal Information *Multiple Submittal Categories* How to submit #1

Public Water + Part 3708 + maybe Delegate-able? (in DuPage or Lake County)

- OWR Cannot delegate the application since the project is located in Public Waters
- Public Water construction always needs a 21-day Public Notice
- Satisfy Part 3704 and 3708 Regulations

How to submit #2

Part 3700 floodplain and define a designated floodway map revision (Part 3708)

For New Hydrology use... "H&H Standards for OWR Mapping Submittals March 2020"

Most always...OWR accepts regulatory flows... <u>if available</u>

Bulletin 75 required for New Hydrologic Studies of entire watershed

Generally don't accept 2-D models (except FEQ, Boneyard SWMM, Rock River model)

New Hydrology/Flow Approval Checklist

□Narrative

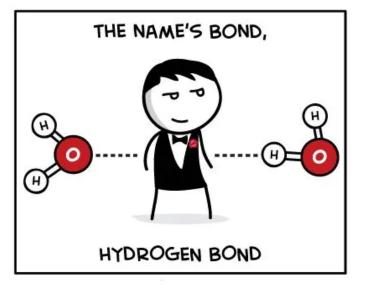

- Project Description
- General Location Map
- □ Analysis Methods
- □ Rainfall Amounts
- □ Rainfall Distributions
- Sensitivity Analysis
- □ Calibration
- Documentation of Restrictive Road Crossings
- □ Signed & Sealed by P.E.
- □ Maps & Schematics
 - □ Include Subbasins & Names
 - □ Include Other Significant Points
 - Aerial Photography
 - □ Topography
 - □ Land Use
 - □ Soils
 - □ Floodplain/Floodway
 - □ Model Schematic

□ Supporting Calculations

- □ Curve Numbers
- □ Lag Time/TC
- □ Rating Curves
- Routing Parameters
- □ Models
 - Hydrologic Print & Electronic
 - □ Hydraulic Print & Electronic
 - Floodway Definition
 - □ Structure-Specific
- □ Summary Tables
 - Subbasin & Section IDs
 - General Hydrology Results
 - Sensitivity Analysis
 - General Hydraulic Results
 - □ Floodway Definition

Use Huff Quartiles within the critical duration analysis to capture peak flows for each sub-watershed. Use Bulletin 75 rainfall Calibrate several events if possible.

Larger watersheds peak with longer duration events, often near their time of concentration durations.

Part 3702 Rules Regulation of Dams

Definition

"Dam" – All manmade obstructions, walls, embankments, or barriers, together with their abutments and appurtenant works,

constructed for the purpose of storing or diverting water or creating a pool.

Also, the dam must be a structure, with placed material, <u>not just excavation</u>.

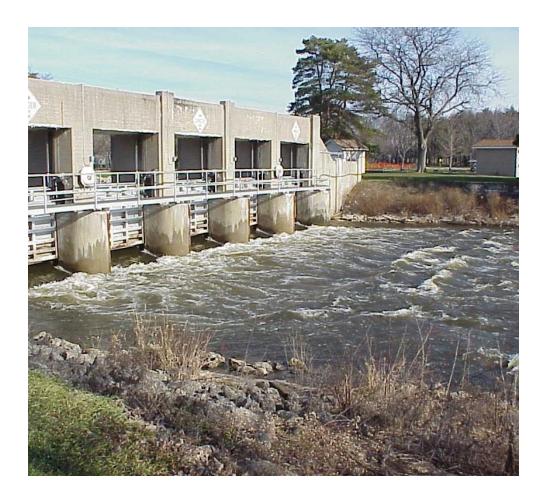

Part 3702 Dam Categorization

Size

(Small, Intermediate, or Large) Based on: Impounding Capacity & Dam Height

Hazard

- Class I (High),
- Class II (Moderate), or
- Class III (Low)

Dam Classification

Class I, II, and III relate to the potential for loss of life...if a sudden failure were to occur.

Class I High Probably Loss of life Like...a baby sleeping on the basement floor

Class II Moderate Probability of loss of life Downstream flooding potential

Class III Low Probability of loss of life Breached dam flows into open space

When is a dam safety permit required?

Construction of a new dam
 (Class I, Class II, or Jurisdictional Class III)

 Major Modification to an existing dam (Major Structural Change)

• Remove an existing dam

An <u>existing dam</u> is defined as a dam which was constructed prior to September 2, 1980.

IDNR/OWR Public Waters Permits (Part 3704 Rules)

3 TYPES OF PUBLIC WATERS

- Natural Waterways
 Such as : Fox River, Des
 Plaines River, Kankakee
- Waterways Improved for Navigation
 Such as : Fox Chain of Lakes
- Man-Made Waterway Such as: I&M Canal, Sanitary and Ship Canal

Appendix A Lists all PWs

IDNR/OWR Public Waters Permits (Part 3704 Rules)

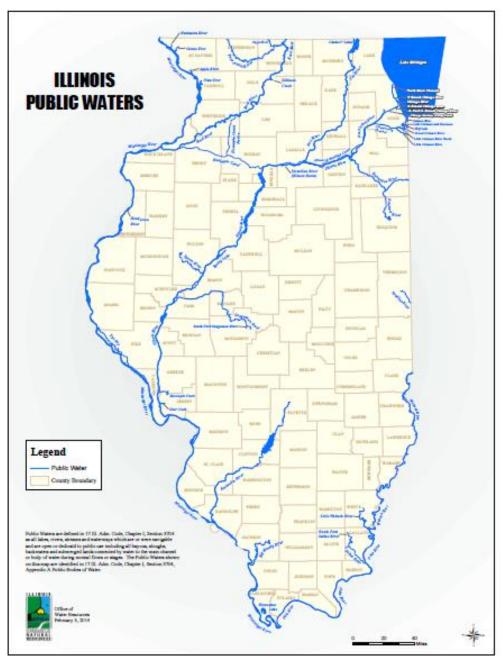

Allowable activities in Public Waters
 Fill placement allowed only if...

REVIEW CONSIDERATIONS

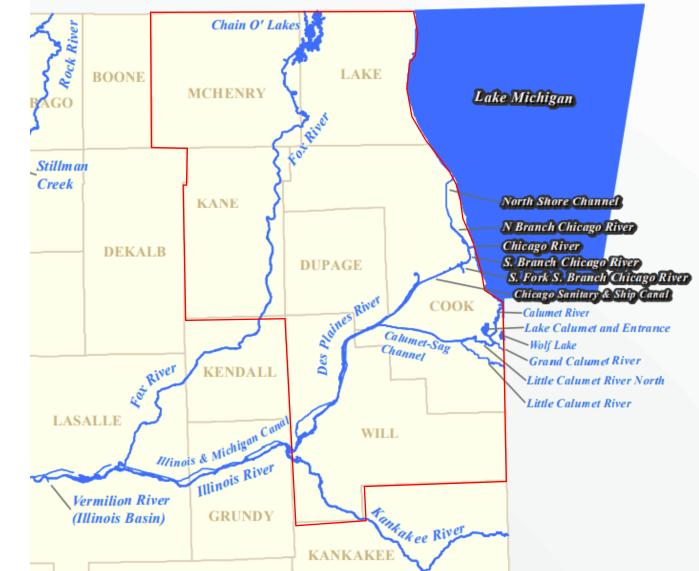

- Navigation Impacts (temp cofferdams?)
- Encroachments
- Impairment of Public's rights, interests and uses
- Impairment of Natural Resources
- No Delegation option

Fill Material can be placed per 3704.70 b) in Public Waters for: bank protection, beach nourishment, spur dikes, dams, emergency projects related to structural failure, authorized by the General Assembly, and more.

Public Notice Process Background

JB Pritzker, Governor • Natalie Phelps Finnie, Director One Natural Resources Way • Springfield, Illinois 62702-1271 www.dnr.illinois.gov

Office of Water Resources • 2050 West Stearns Road • Bartlett, Illinois 60103

PUBLIC NOTICE FLOODWAY MAP REVISION FOR MIDLOTHIAN CREEK IN THE VILLAGE OF OAK FOREST

The Village of Oak Forest, 15440 Central Ave, Oak Forest, IL 60452 has requested from the Illinois Department of Natural Resources, Office of Water Resources concurrence with a floodway map revision along Midlothian Creek in Cook County. The proposed floodway map revision is included in this packet and is located adjacent to the intersection of Cicero Avenue and 159th Street. This public notice is being issued pursuant to the State of Illinois Floodway Map Revision Concurrence Rules.

The proposed revision is based on updated rainfall hydrology, recent culvert construction, and accurate topographic survey information. The floodway is narrower on the southside of 159th Street due to the recent construction of <u>520 foot long</u> culvert under 159th Street and Cicero Avenue. The 100-year flood elevations were computer simulated reflecting the post-project constructed culvert and channel. The revised floodplain map (also called an annotated map) is included in this 4-page packet of information. Panel 17031C0726J of the Cook County Flood Insurance Rate Map will be revised to reflect these changes. The flood profile is also being revised. The site of the proposed work is located in Sections 15,16, and 21, Township 36 North, Range 13 East of the Third Principal Meridian in Cook County.

Information on the proposed floodway map revision may be seen by appointment at the IDNR/OWR Northeastern Illinois Regulatory Programs Section office, 2050 West Stearns Road, Bartlett, IL 60103. Inquiries and requests to review the floodway map revision and plans may be directed to Mark Hoskins of the Bartlett Office at 847/ 608-3116. Additional information about this project is on our website at <u>www.dnr.illinois.qov/waterresources</u>. You may also contact the applicant's engineer, Zachary Shuster of Baxter and Woodman Consulting Engineers at 815/ 459-1260.

You are invited to send written comments regarding the proposed floodway map revision to the Bartlett Office by March 31, 2023.

If you wish to contest the correctness of the revised floodway, please submit technical evidence of error, or changed conditions. The IDNR/OWR will review the evidence to determine the correctness of the floodway delineation.

A 21-day Public Notice is needed for:

- Regulatory floodway map revisions or flood profile changes.
- Projects in public waters that are not authorized by a Regional (RP3), Statewide (SW 1-12) or General Permit.
- Dam modification formal permits.

Part 3730 Allocation of Water from Lake Michigan

Domestic Water Supply

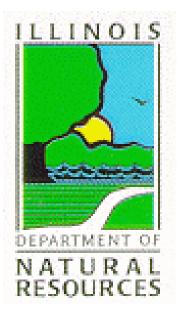

Serve communities in Cook, Lake, DuPage, Kane, and Will **Permits and allocation** assigned to each municipality

Direct Diversion

Navigation: provide safe navigation in Sanitary Ship Canal **Discretionary**: improve water quality in the canal systems

Stormwater Runoff

Diverted water from Lake Michigan to flow unto the Chicago River and Calumet Rivers. USACE calculates this inflow to meet from US Supreme Court Rulings
