

ILLINOIS MITIGATION UPDATE

*Where are we at,
and what have we
learned?*

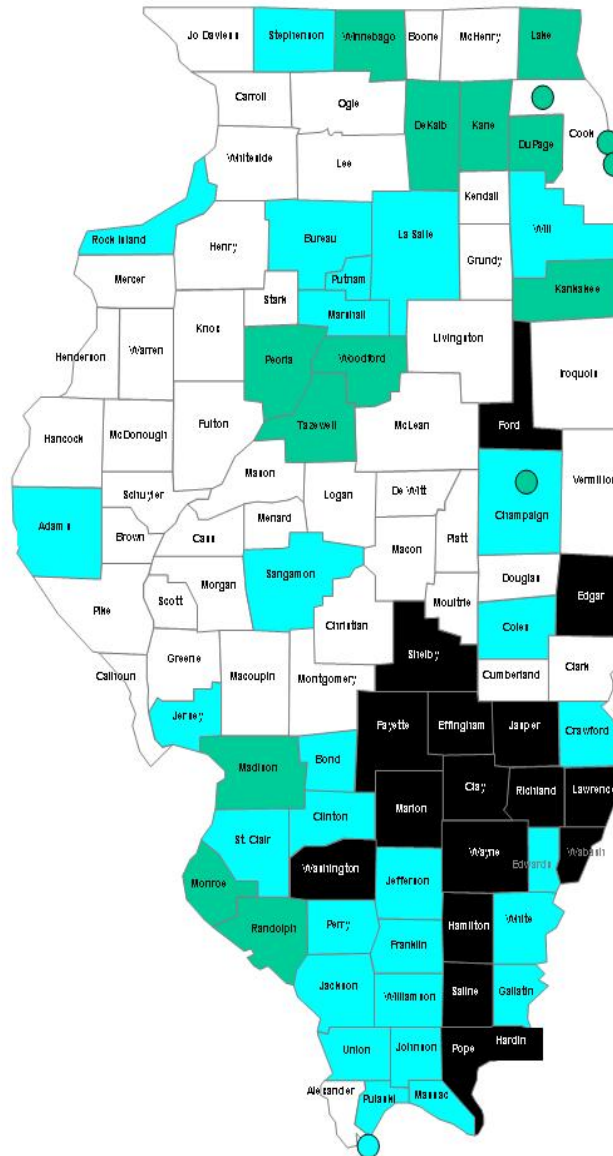

IEMA

2 years ago...

- Local jurisdictions with a DMA2k approved plan.
- Local jurisdictions that are developing DMA2k plans
- Local jurisdictions that have submitted planning applications
- Non NFIP Counties

June 2008 Planning Statistics		
Counties Covered by Mitigation Plans	12 Counties	Represents 11% of State
Counties with Mitigation Plans in Progress	28 Counties	Represents 27% of State
Counties that had not started a Mitigation Plan	43 Counties	Represents 42% of State
Counties that do not participate in the National Flood Insurance Program	17 Counties	Represents 16% of State

IEEMA

NOW

- Local jurisdictions with a DMA2k approved plan. (37% of State)
- Local jurisdictions that are developing DMA2k plans (39% of State)
- Local jurisdiction ineligible for PDM planning funds because they don't participate in the NFIP.

January 2010 Planning Statistics			
Counties Covered by Mitigation Plans	38 Counties	Represents 37% of State	216% increase
Counties with Mitigation Plans in Progress	40 Counties	Represents 39% of State	42% increase
Counties that have not started a Mitigation Plan	18 Counties	Represents 17% of State	58% decrease
Counties that do not participate in the National Flood Insurance Program	13 Counties	Represents 12% of State	23% decrease

Illinois Mitigation Planning Status

Counties that have not started a Mitigation Plan	18 Counties	Represents 17% of State	58% decrease
Counties that do not participate in the National Flood Insurance Program	13 Counties	Represents 12% of State	23% decrease

Factors Contributing to Success in Mitigation Plan Development

- 4 federally declared disasters in this timeframe (1771, 1800, 1826, 1850)
- -8 Declared events since 2007 (1681, 1722, 1729, 1747)
- DMA2K pre-requisites for funding
- FEMA/IEMA technical assistance to local governments
- National trend is focusing on mitigation
- Widely available funds as a result of the numerous declared events (HMGP)
- Shared interest for mitigation with agencies like IDNR, and DCEO

Also worth noting...

When dating back to 1965 we have had 32 federally declared flood events.

**-Essentially this means we average .72
Flood declarations per year.**

**-as a point of interest, when dating back to 1993
we have had 15 flood events declared. In other
words, since 1993 we average .93 flood
declarations per year**

Continued...

When dating back to 1965 we have had 667 federally declared counties in 32 events.

-Essentially, this means we average 15.16 declared counties per year

-as a point of interest, when dating back to 1993 we have had 354 declared counties in 15 events. We average 22.125 declared counties per year since 1993

State Goals...

- Fund Mitigation Plans in each Illinois County
- Reduce # of Repetitive Loss Structures
- Establish solid GIS data
- Coordinate new project development
