

CITY OF WASHINGTON STORMWATER MASTER PLAN

Project Personnel

- **City of Washington**

- Dennis Carr, PE – City Engineer

- **Consulting Engineers**

- Fehr Graham Engineering & Environmental
 - Jeff Macke, PE, CFM – Senior Project Engineer
 - Marlyn Ripalda – Staff Hydrologist
- TWM, Inc.
 - Serena Page, PE, PLS – Branch Manager
 - Chris Kuester, PE, CFM – Project Engineer
 - Kyle Lynch, EI – Engineering Designer

City of Washington

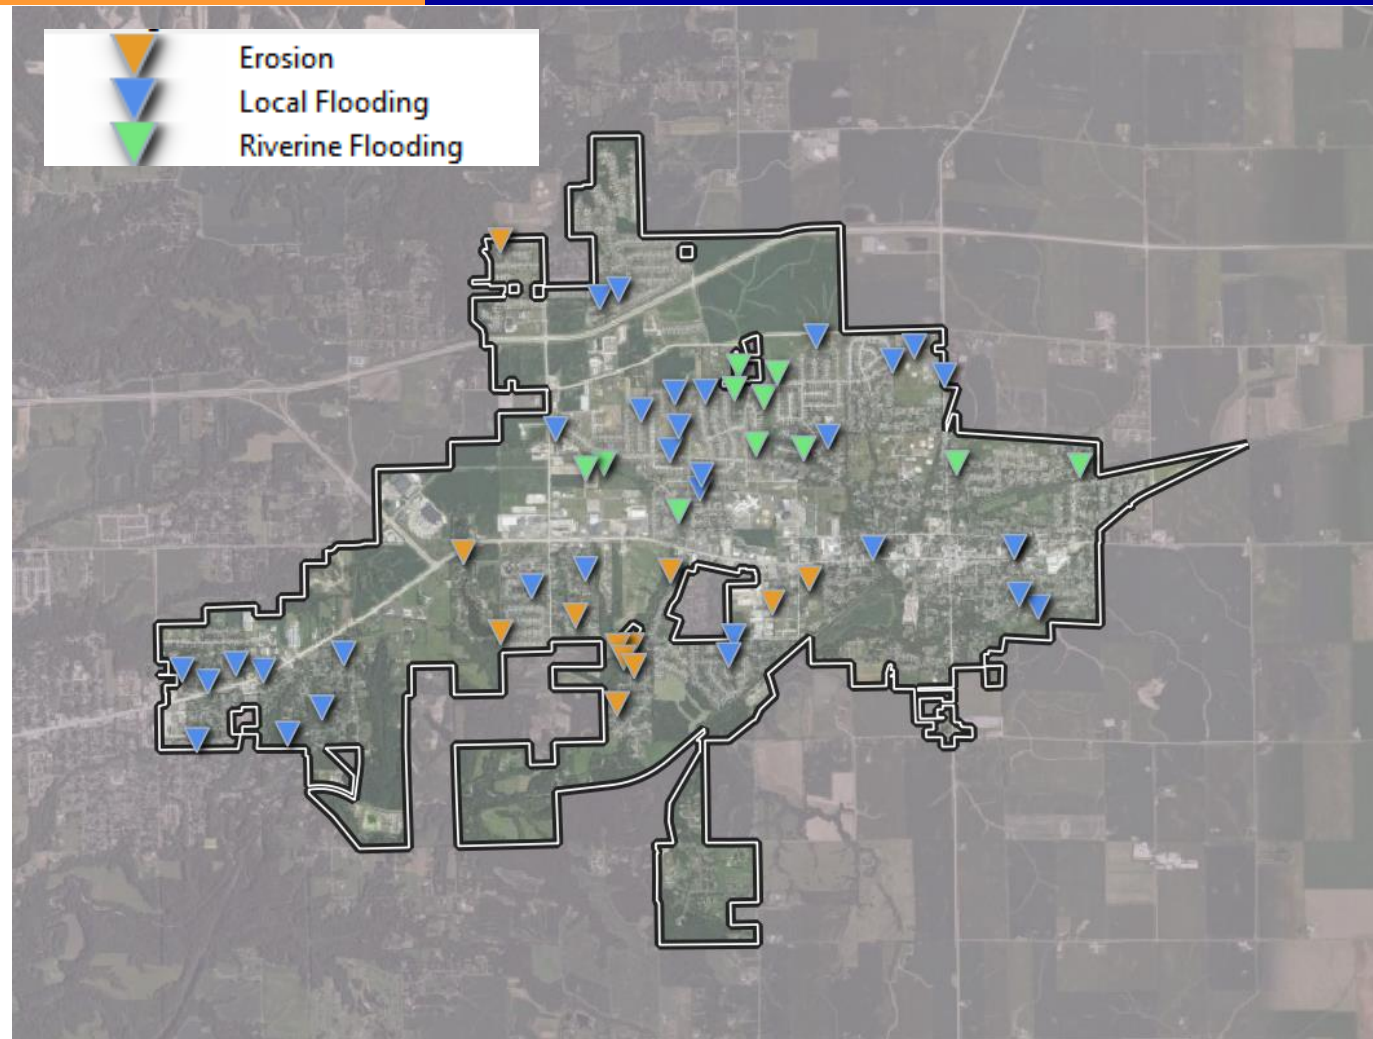

Population = 16,500

City Size = 8.2 sq. mi.

Stormwater Issues

As reported by the
City of Washington

Plan Approach

- **Modeling**

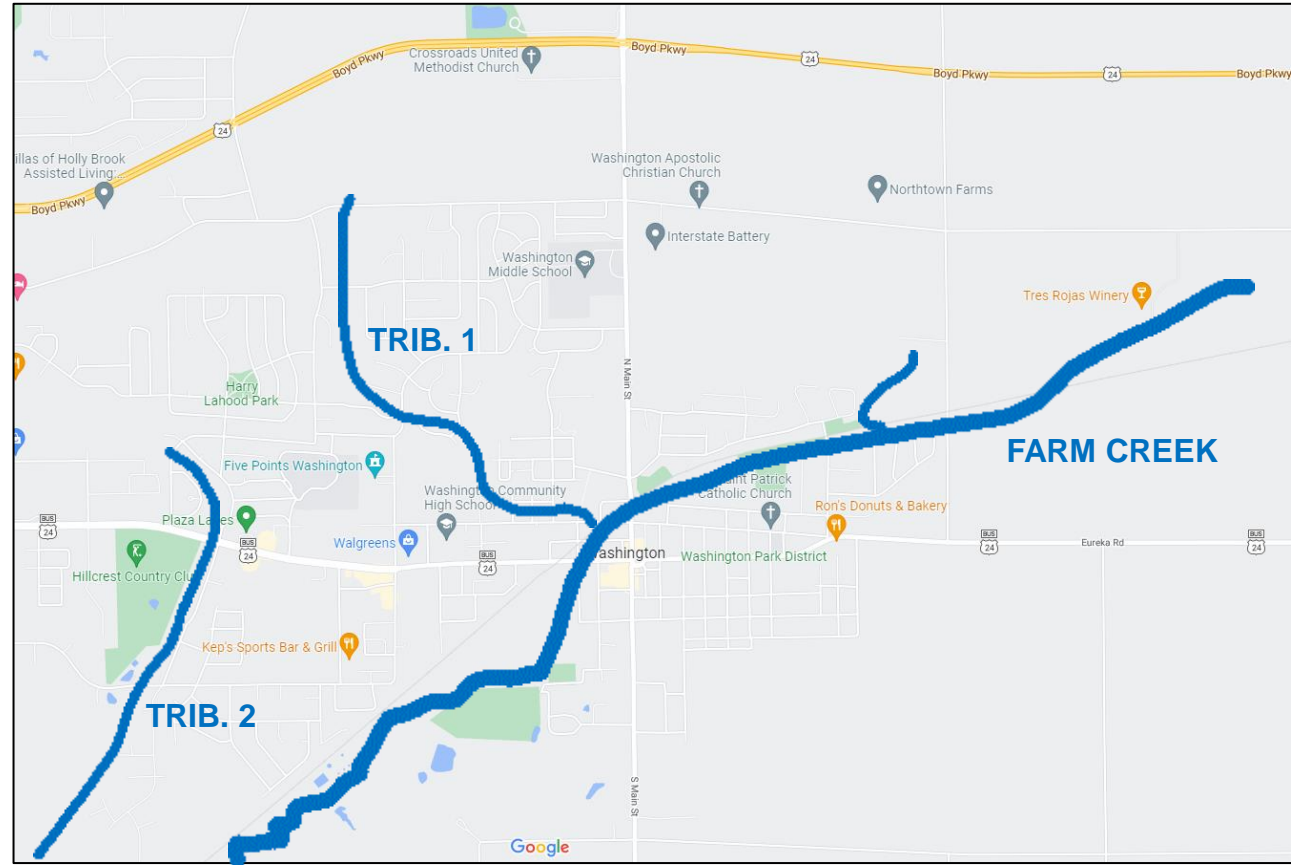

- Hydrology
 - Curve Number in SWMM and HEC-HMS
- Streams in HEC-RAS
 - 1D steady and unsteady
- Inland areas in PC SWMM
 - 2D model for overflows

- **Projects**

- Complaint Areas
- Risks identified in Modeling
- Prioritize by combination of the two above factors.

Riverine Flooding

- **FEMA Waterways**
 - Farm Creek (Zone AE)
 - Defined Tributaries
 - 1 (Zone AE)
 - 1A (Zone A)
 - 2 (Zone A)

Riverine Flooding

- Hydrologic Calculations

- Sub-basins per County LiDAR data
- SCS CN values

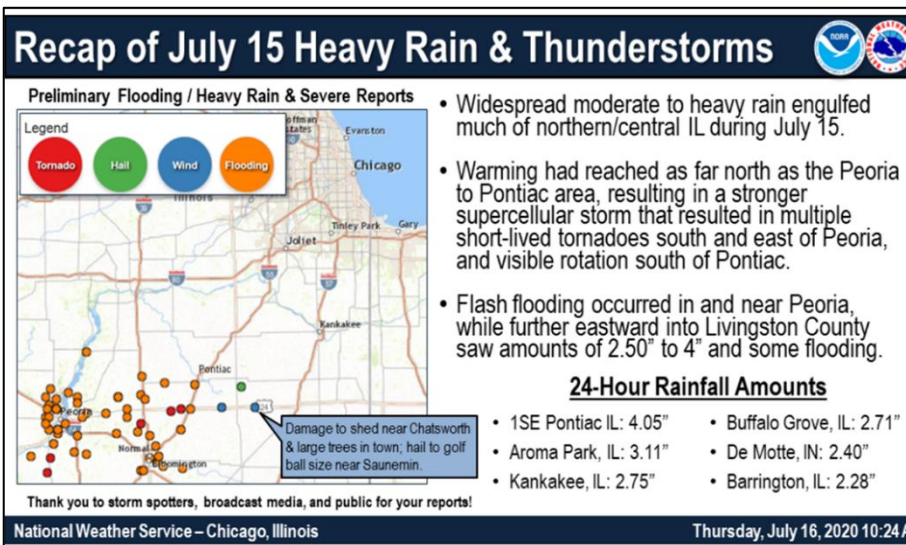

- Hydraulic Calculations

- HEC-RAS calculations
- Mix of 1D and 2D analysis
 - Primarily steady-state analysis

Riverine Flooding

- Recurrence Intervals
 - 2- to 500-year events
 - July 2020 flooding
 - ~5 inches rainfall on July 15 in Peoria

Riverine Flooding

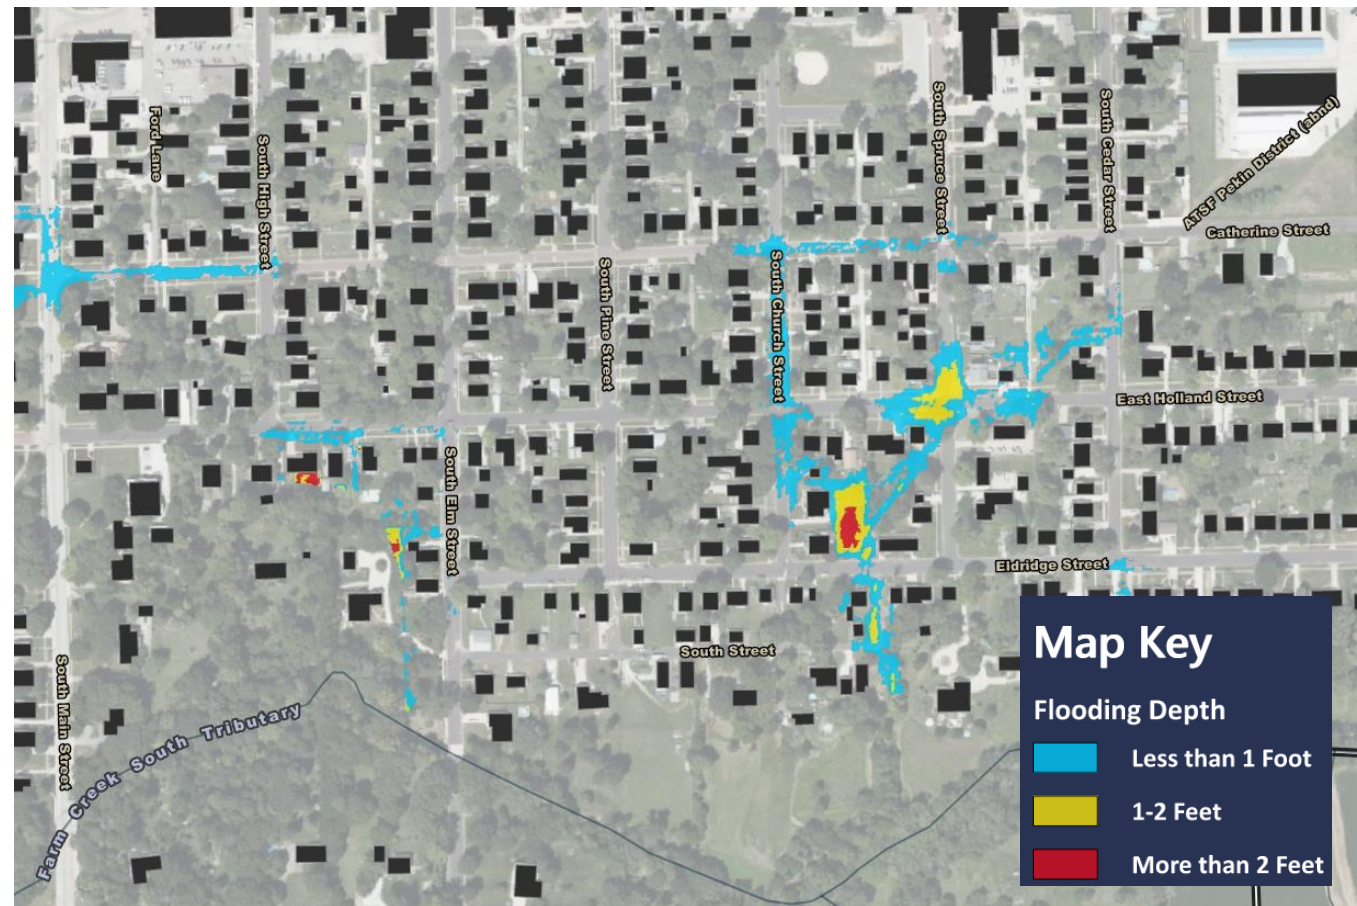

- Regional Detention
 - Used to limit flows through developed areas

Flash Flooding Depth Maps

Inland Flooding

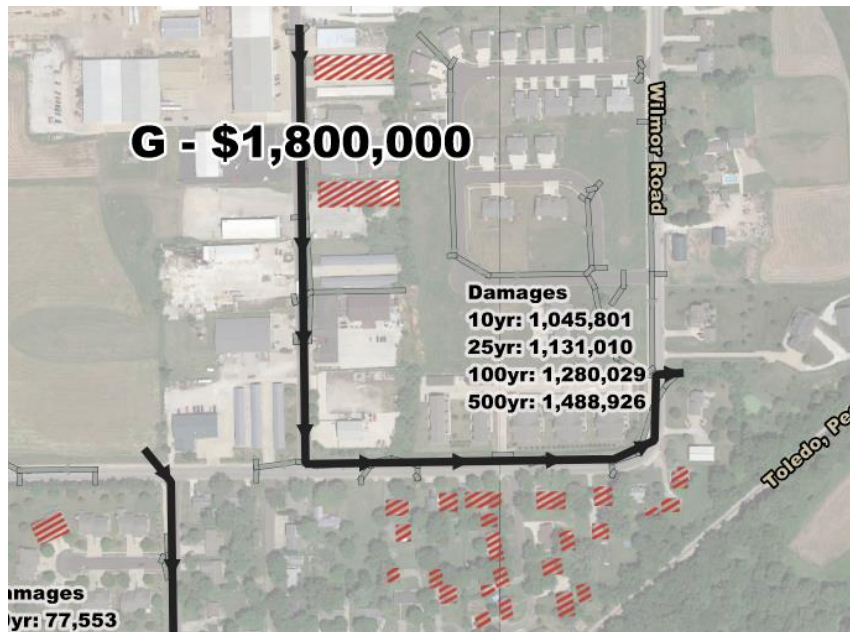

10 - 500-yr

Flood Damages and Cost Effectiveness

• Project G

- 10-Year Damages = \$1.0M
- Project Cost = \$1.8 M

• Project V

- 10-Year Damages = \$0.1M
- Project Cost = \$1.0 M

Flood Damages from 2022 to 2072

Damage to buildings in Washington, Illinois due to urban flooding.

Run 1 Sim

Sim 1

10-year floods: 2042, 2049, 2052, 2054, 2058, 2070

10-year damages \$30,000,000

25-year floods: 2029, 2041, 2057

25-year damages \$21,000,000

100-year floods: 2068

100-year damages \$10,000,000

500-year floods: 2026

500-year damages \$16,000,000

Total damages \$77,000,000.0

This app performs monte carlo analysis of flood damages in Washington.

- Python libraries: seaborn, pandas, random, streamlit

Flood Damages from 2022 to 2072

Damage to buildings in Washington, Illinois due to urban flooding.

Run 1 Sim

Sim 2

10-year floods: 2024, 2026, 2035, 2046, 2052, 2061

10-year damages \$30,000,000

25-year floods: 2064

25-year damages \$7,000,000

100-year floods:

100-year damages \$0

500-year floods: 2062

500-year damages \$16,000,000

Total damages \$53,000,000.0

This app performs monte carlo analysis of flood damages in Washington.

- Python libraries: seaborn, pandas, random, streamlit

Project Priorities

- Key Variables
 - Known complaints
 - Cost Effectiveness
 - Funding Eligibility
